ABOUT

A software engineer working primarily within the ReactJS ecosystem, along with ExpressJS, and NoSQL databases like Firebase. My previous experience in hospitality and education have given me invaluable skills in communication, planning, and team management. Given the opportunity, I know both my technical and soft skills will be a great addition to your engineering team.

WORK EXPERIENCE

English as a Foreign Language Teacher Oct. '21-Present *Self-Employed*

- Successfully taking students from A2-C1 English proficiency
- Student progress assessment
- Test prep for IELTS & Cambridge English exam

Cafe Consultant/Head Barista May '19-Mar '21 *Self-Employed - Creature Coffee Co., Austin, TX*

- Training and educating employees on coffee farming/supply chain
- Given a limited budget increased daily sales from ~300 to ~600 USD
- Worked with new small businesses to increase brand awareness.
- Continually created new specialty drinks to increase foot traffic

PROJECTS

Whats Playing in my Country? whatsplayinginmycountry.netlify.app

Fullstack Web Application

A fully responsive fullstack application which queries the TMDB database for currently and upcoming films depending on the country you select. Allows a user to create an account, login, and save/delete movies to & from their watchlist which is stored in a database

Built with:

- Vite.
- Typescript
- React
- Firebase (DB & Auth)
- NodeJS
- Styled Components
- React-Router V6
- Context API

Kevin Q. To Photography kevinqtophoto.com

Photography Portfolio & e-commerce (print store)

A desktop/mobile friendly website to host my personal photography projects. Has a print store which uses the prebuilt checkout from the Stripe API. Store cart state migrated from Context API to Redux Toolkit. Deployed onto CloudFlare CDN

Built with:

- Vite.
- Typescript
- React
- Redux Toolkit
- Stripe API
- Styled Components
- React-Router V6
- Cloudflare CDN
- React-Spring

Reel Talk Film Blog reel-talk.vercel.app

JAMstack blogging website

A fully responsive personal film blog focused on foreign/art films. Built with AstroJS framework for lightning fast content delivery. Leverages SSR and island architecture philosophy. Blog posts are written in MDX

Built with:

- AstroJS
- Typescript
- Vanilla CSS
- MDX
