EXPERIENCE

Frontend Developer - Freelance

Oct. 2021 - present

- Built fullstack MERN (MongoDB, Express, ReactJS, NodeJS) applications according to needs of the given project
 - Built SEO friendly websites using NextJS and AstroJS, which leverages SSR (server side rendering) to deliver content with maximum speed and minimal loading time
 - Delivered high quality and maintainable Typescript code on time given a deadline
 - Implemented user authentication and verification to secure sensitive user and application data with Firebase services
 - Implemented payments and billing functionality via Stripe API for E-commerce websites
 - Enhanced websites with engaging and dynamic animations using React-Spring to improve user experience and convert users to customers
 - Deployed websites to a CDN (Cloud Distributed Network) to reach users around the world without any compromise to site performance
 - Contributed to open-source projects by providing beginner friendly tutorials and examples to the community and newcomers (React-Spring)
-

EDUCATION

- Full Stack Open - University of Helsinki Finland
- ThreeJS Journey - ThreeJS Journey by Bruno Simon
