KEVIN TO

FULLSTACK DEVELOPER

ABOUT ME

A frontend developer proficient in Typescript and ReactJS. building responsive, engaging, and well designed websites. Delivering high quality, maintainable, and performant code at the same time.

TECHNOLOGIES AND TOOLING

HTML5 | CSS3 | Javascript | Typescript | ReactJS | NodeJS | ExpressJS | MongoDB | Firebase | Vercel | Netlify | Postman | NextJS | AstroJS | Git

EXPERIENCE

Frontend Developer - Freelance   Oct. 2021 - present

- Built MERN (MongoDB, Express, ReactJS, NodeJS) applications according to needs of the given project
- Built SEO friendly websites using popular frameworks like NextJS and AstroJS
- Contributed to open-source projects by providing beginner friendly tutorials and examples to the community and newcomers (React-Spring)

AOL Instant Messenger - *Freelance*   *Github*

- Real-time chat application using websockets via socket.io and built with React, Typescript, and Express in the style of windowsXP
- Allows users to create & join private rooms. Equipped with all the sounds of AIM notifications

Announce it App - *Freelance*   *Github*

- Fullstack MERN (MongoDB, Express, ReactJS, NodeJS) application with user authentication and verification to secure sensitive user and application data using Firebase services
- Allows users to create teams, add teammates, and push notifications to a newsfeed. Requests are handled using a REST API and allows for CRUD operations

Photography Portfolio and E-commerce store - *Freelance*   See it live   *Github*

- Implemented payments and billing functionality via Stripe API for E-commerce websites
- Deployed on a CDN (Cloud Distributed Network) to deliver the website around the world with reduced wait times
- Uses Redux Toolkit to manage shopping cart state
- Uses React-Spring to create realistic and smooth animations to improve user experience

Film Blog - *Freelance*   See it live   *Github*

- Uses AstroJS framework to deliver static content with maximum speed and minimal code
- Takes advantage of SSR (server side rendering), and partial hydration to load javascript only when necessary
- Content is all written in markdown

EDUCATION

- Full Stack Open - University of Helsinki Finland
- ThreeJS Journey - ThreeJS Journey by Bruno Simon
