Specialty coffee consultant working in Austin TX
- Employee training
- Employee Scheduling
- Created & lead educational coffee farming/process classes
- Cafe budgeting
- Catering event scheduling
- Team management

PROJECTS

Whats Playing in my Country?   *whatsplayinginmycountry.netlify.app*

Fullstack Web Application

A fully responsive fullstack application which queries the TMDB database for currently and upcoming films depending on the country you select. Allows a user to create an account, login, and save/delete movies to & from their watchlist which is stored in a database

Built with:
- Vite.
- Typescript
- React
- Firebase (DB & Auth)
- NodeJS
- Styled Components
- React-Router V6
- Context API
- Netlify

Kevin Q. To Photography   *kevinqtophoto.com*

Photography Portfolio & e-commerce (print store)

A desktop/mobile friendly website to host my personal photography projects. Has a print store which uses the prebuilt checkout from the Stripe API. Store cart state migrated from Context API to Redux Toolkit. Deployed onto CloudFlare CDN

Built with:
- Vite.
- Typescript
- React
- Redux Toolkit
- Stripe API
- Styled Components
- React-Router V6
- Cloudflare CDN
- React-Spring

Reel Talk Film Blog   *reel-talk.vercel.app*

JAMstack blogging website

A fully responsive personal film blog focused on foreign/art films. Built with AstroJS framework for lightning fast content delivery. Leverages SSR and island architecture philosophy. Blog posts are written in MDX

Built with:
- AstroJS
- Typescript
- Vanilla CSS
- MDX
- Vercel
